

Dear SSIEM members,

We are happy to announce the first SSIEM course on next generation sequencing and clinical genomics that will take place in Barcelona. Targeted audience are professionals in clinical and medical genetics, biochemists and molecular biologists who want to learn more on clinical genomics and more specifically on next generation sequencing.

Morning lectures will be followed by afternoon hands on sessions using personal computers and availability to databases to solve real cases. The program is attached, and can also be found at the SSIEM website.

Venue: Faculty of Medicine, University of Barcelona, C/ Casanovas, 143, 08036 Barcelona

Dates: 18th to 20th March 2019. The first day the course will start at 11:30h, so that attendees could travel on the same day.

Number of attendees: Places are limited to 40 people. If the course is oversubscribed there may be a selection process based on motivation and CV.

Application deadline: The application process is online through the SSIEM website from 2nd January until midnight on January 25th 2019. Accepted delegates will be informed within two weeks of the application deadline.

Registration: The inscription fee is €120, it covers all the expenses including 2 days hotel accommodation, lunches for the 3 days and 2 days evening meal. Please, note that travelling to Barcelona is not included.

Coordinators of the course: Antònia Ribes and Frederic Tort

Yours sincerely,

Manuel Schiff, Hon. SSIEM Secretary on behalf of Antònia Ribes and Frederic Tort
