

Galactosaemia Support Group Family Weekend Away 2022

We were so grateful to receive £2500 from SSIEM towards our family weekend away in 2022. Our weekends give our families the opportunity to meet with others dealing with the same problems on a day to day basis, share experiences and ideas and for the children to get together and meet with old friends and make new ones. The older children and galactosaemic adults relish the opportunity to meet others “like themselves” and many become firm friends.

The generous donation from the SSIEM enabled us to subsidise the price for all our families and even offer a couple of families, who would otherwise have not been able to afford to join us, complimentary places, for which they were very thankful. The money also enabled us to purchase suitable food samples for our “new products table” for our families to see and taste.

We would like to send a big thank you from all our families for your help and support.
