

SSIEM Training Bursary Report 2024

Dear SSIEM,

I am very grateful for receiving the SSIEM training bursary. I spent 10 months at the Lysosomal and Metabolic Center of Erasmus MC, Rotterdam, the Netherlands, as part of my 4th year of pediatric residency,

During this period, under the supervision of prof. A.T. van der Ploeg and dr. J.M.P van den Hout, I joined the clinical and research team. I was involved in laboratory meetings, outpatient clinic, multidisciplinary meetings and research meetings, as well as many research projects, mostly focusing on Pompe Disease.

Thanks to this period abroad, a precious collaboration between the Metabolic Centers of Rotterdam and Monza has been established, and I learnt a lot both in the clinical and research field.

Martha Caterina Faraguna

Residency in Pediatrics, PhD student, Fondazione IRCCS San Gerardo dei Tintori, Monza, Italy
